Lorena

It was good to talk with you last week about all of the goals for the 6th Street Community. I spoke with Eric At Chrestensen Design and I saw the email for the design proposal. I thought that the path you are going down is great, I believe that is exactly what the area needs to bring back family's that will spend the day there as a destination. I spoke with Mitch Chemers at Imagetech Services who specializes in this type of project for City approval of public works jobs. His web site is Signbump.com Mitch estimates that this approval would run between \$2000 and \$4000, the reason for the spread is that this may require many meetings for presentation of design and may require a mock up scale model of the sign. We estimate it will take 60 days for approval of the sign package. We will work with the committee on getting all of the documentation needed. I hope this will help you at your meeting tomorrow.

Thanks
